

SPATULA STUHHI

Must not be diluted before use.

Treatable after about 12-14 hours. Totally dry after 28 days.

Conservation: in a dry, cool place, away from the frost and humidity.

Step 1 - To start, apply Spatula Stuhhi Primer Naturale.

Step 2 - Prepare the shade with our paints indicated in the sample collection and mix with the beater; allow to rest for 24 hours.

Step 3 - First Coat, while standing the product relaxes making this job easy.

Step 4 - Second Coat, the surface is perfectly dry and absorbent giving a completely smooth surface, the ideal requisite for an excellent THIRD COAT.

Step 5 - Third Coat, an important trick to achieve an easy polish is to mix Spatula Stuhhi well to make it more liquid.

Step 6 - Here is a picture of the two different consistencies. Use our special spatulas, especially for the third coat.

Step 7 - At this point the product will penetrate into every little crack and with slight pressure the surface will be perfectly smooth. We apply... and remove Spatula Stuhhi for about 1 square meter and ...

Step 8 - ... 30 seconds later we polish using a very clean spatula, in this way. We go on to the next square meter, overlapping the first to eliminate any sign of seams.

Step 9 - At this point the job is finished. The wall is compact, glossy, soft and completely breathable.
